

RootRise

THE DIAGNOSTIC

Where you stand, why, and what to do first

An honest, evidence-backed answer — built around the goal you declare.

Built and governed by **DEVONEERS Technology**

The RootRise Diagnostic turns your documents and answers into an honest, evidence-backed picture of where the business stands. From there, it builds your growth roadmap and a detailed action plan around the goal you declare.

WHAT YOU RECEIVE

Where you stand

A 0-100 score on every area you choose, one readiness number for your goal — and the evidence behind each, one tap away.

What to do first

Every action ranked by what moves your goal — now, next, later — with an honest read of the effort, and a working draft built from your own data.

Reports people use

A working report for your team, and a visual summary you can hand straight to a bank or a board.

Where an area maps to a standard, the report also speaks the auditor's language — and states how far you stand from the certificate.

It asks what you want to achieve before anything else. A diagnostic that asks everyone the same questions is a questionnaire — different goals deserve different depth, priorities, and reports.

THE VALUE IT CREATES

Focus, not firefighting

Money and effort go where they move your goal, instead of wherever the day pulls them.

Credibility where it counts

A number a bank, buyer, donor, or certifier can trust — because every score shows its work.

No disruption to run it

Runs around your business — your language, your pace, with or without paperwork.

Progress you can prove

Measure again on the same ruler in six to eighteen months — and show, in writing, what moved.

FOR PROGRAMMES & INSTITUTIONS

One diagnostic across your whole cohort — every enterprise on the same ruler, under your brand, with results reported the way your funder expects, from measured baseline to endline.

Built to institutional assurance standards. Enterprise data isolated & secured, personal information protected, AI governed with human oversight — designed to:

ISO 27001

ISO 27701

ISO 42001

The clearest test is one of your own enterprises — book a demo, run a diagnostic.

Priced per enterprise, full pricing shared in discovery.
