

Which deals to back, and what would make them ready

Investor-grade discipline and founder readiness — one engine, calibrated to your mandate.

Built and governed by **DEVONEERS Technology**

VCDNA turns every company you consider into a consistent, evidence-traced, IC-ready assessment — calibrated to your mandate.

WHAT YOU RECEIVE

What to decide

Lens-by-lens scores, a clear call, and an analyst-voice memo for committee — every claim traceable to its evidence.

The founder's path

A prioritized readiness plan with ready-to-use, investor-grade artifacts — built from the company's own evidence.

The portfolio view

Comparable scoring across companies and cohorts, tracked over time — who moved, who stalled, where to focus.

■ *The platform structures the evidence; the decision stays with your partners — always.*

Dual-sided by design. One engine powers investor evaluation and founder coaching — rigor lifts readiness, and readiness sharpens the next evaluation.

THE VALUE IT CREATES

Better capital decisions

Every company evaluated to one standard, with risks surfaced before capital is committed.

More investable companies

Structured coaching lifts readiness, helping more of each cohort reach follow-on funding.

A process you can prove

Evidence-traced scores and an immutable record — a defensible account for the IC and LPs.

Senior expertise, multiplied

Partners focus on judgment, freeing one expert to cover two or three cohorts.

FOR FUNDS & THEIR FUNDERS

Decision infrastructure built for impact reporting — longitudinal cohort tracking and measurable impact scoring give managers the evidence base to report outcomes to LPs, boards, and development funders.

Built to institutional assurance standards. Data isolated, cross-verified AI, every score traceable — designed to:

ISO 27001

ISO 27701

ISO 42001

The clearest test is your own pipeline — book a demo, run a pilot.

Full pricing in discovery.
